İSTON, 1986 yılında İstanbul Büyükşehir Belediyesi tarafından; kentin altyapı ve üstyapı ihtiyaçlarına yüksek kaliteli ve yenilikçi çözümler sunmak; mühendislik, teknoloji ve tasarımın yaratıcı gücüyle kentlerin geleceğini şekillendirerek, yaşam alanlarını iyileştirmek amacıyla kuruldu. Şehirlerin geleceğini şekillendirirken, çalışanları ve paydaşları tarafından en çok tercih edilen, sektörde öncü marka olma vizyonuna sahip İSTON ürünleri, yalnızca İstanbul ve Türkiye'nin çeşitli şehirlerinde değil; ihracat faaliyetleriyle dünyanın birçok ülkesinde de tercih ediliyor.

İSTON, yaklaşık 1000 kişilik uzman kadrosuyla Altunizade, Bayrampaşa, Hadımköy, Tuzla, Yenibosna, ve Esenler Giyimkent'te Genel Müdürlük binası dâhil olmak üzere altı farklı yerleşkede faaliyet gösteriyor. Geniş ürün portföyüyle; kent mobilyaları, oyun grupları, beton ve betonarme borular, parke taşları ve bordürler, hazır beton, prefabrik altyapı elemanları gibi ürünlerin yanı sıra mimari tasarım, kentsel proje uygulamaları, taahhüt ve yapı denetim hizmetleri de sunuyor. Tüm faaliyetlerini; İş Sağlığı ve Güvenliği Yönetim Sistemi, Çevre Yönetim ve Kalite Güvence Sistemi, Bilgi Güvenliği Yönetim Sistemi, Enerji Yönetim Sistemi, İnovasyon Yönetim Sistemi, Su Verimliliği Yönetim Sistemi ve Kalite Laboratuvar Yönetim Sistemi çerçevesinde yürüten şirket, sürdürülebilirliği temel kurumsal ilkelerinden biri olarak benimsiyor. Bu kapsamda şirketin Hadımköy üretim tesisi, Uluslararası Beton Sürdürülebilirlik Konseyi (CSC) tarafından hazır beton sektöründe platin seviye sertifika alan ilk ve tek tesis oldu, Tuzla fabrikası ise gümüş sertifikasını yeniledi.

İSTON, Ar-Ge ve tasarıma yaptığı yatırımlarla, kent yaşamına ve inşaat sektörüne yenilikçi ürünler ve teknolojiler kazandırırken, ulusal ve uluslararası ölçekte sektör-akademi iş birliklerinde de aktif olarak rol alıyor. Şehirlerin geleceğiyle uyumlu ürünler ve tasarımlar geliştiren şirket, kentsel alanların estetiğini, konforunu ve kalitesini artırmaya odaklanıyor. 2.000'i aşkın ürün çeşidiyle, küresel inşaat sektörünün en kapsamlı şirketlerinden biri olarak yeni ürün ve hizmetlerle faaliyet alanlarını sürekli geliştiriyor ve genişletiyor.

"Yeni Nesil Belediyecilik" vizyonu doğrultusunda, kentsel ürün ve hizmetlere yeni boyutlar kazandıran şirket; ülkemizle tanıştırdığı 3D Beton Yazıcı teknolojisiyle geliştirdiği kent mobilyaları ile konut ve ofis yapıları sayesinde, Türkiye'deki yapı sektörünün dijital dönüşümüne de öncülük ediyor.

Türkiye Hazır Beton Birliği ve Türkiye Prefabrik Birliği'nin aktif bir üyesi olan İSTON, pek çok ödül ve sertifikaya layık görülmesinin yanı sıra güçlü piyasa konumu ve finansal performansıyla yine Fortune 500 listesinde ve ISO İkinci 500 listelerinde yer alıyor

İSTON was founded in 1986 by the Istanbul Metropolitan Municipality to provide high-quality and innovative solutions for urban infrastructure and superstructure needs, and to enhance living spaces by shaping the future of cities through the creative integration of engineering, technology, and design. With a vision of being a sector-leading brand preferred by its employees and stakeholders, İSTON products are not only widely used in Istanbul and across Türkiye, but are also chosen in many countries worldwide through its export activities.

İSTON operates across six different campuses—including its Headquarters—with an expert workforce of approximately 1,000 employees in Altunizade, Bayrampaşa, Hadımköy, Tuzla, Yenibosna, and Esenler Giyimkent. With its broad product portfolio, the company offers urban furniture, playground equipment, concrete and reinforced concrete pipes, paving stones and curbstones, ready-mixed concrete, and prefabricated infrastructure elements, as well as architectural design, urban project implementation, contracting, and building inspection services. Conducting all its operations within the framework of the Occupational Health and Safety Management System, Environmental Management and Quality Assurance System, Information Security Management System, Energy Management System, Innovation Management System, Water Efficiency Management System, and Quality Laboratory Management System, the company embraces sustainability as one of its core corporate principles. In this context, the company's Hadımköy production facility became the first and only plant in the ready-mixed concrete sector to receive platinum level certification from the International Council for Concrete Sustainability (CSC), while its Tuzla factory renewed its silver certification..

İSTON, through its investments in R&D and design, introduces innovative products and technologies to urban life and the construction sector, while also playing an active role in industry–academia collaborations at both national and international levels. Developing products and designs aligned with the future of cities, the company focuses on enhancing the aesthetics, comfort, and overall quality of urban spaces. With a portfolio of more than 2,000 product types, İSTON is one of the most comprehensive companies in the global construction sector, continuously improving and expanding its fields of activity through new products and services

Guided by the vision of "Next-Generation Municipalism," the company adds new dimensions to urban products and services; through its urban furniture as well as residential and office structures developed using 3D Concrete Printing technology—introduced to the country by the company—it also pioneers the digital transformation of the construction sector in Türkiye.

As an active member of the Turkish Ready-Mixed Concrete Association and the Turkish Prefabrication Association, İSTON has been honored with numerous awards and certifications, and continues to be included in the Fortune 500 list and the ISO Second 500 list, supported by its strong market position and financial performance.

Kentte Konfor
Comfort in the City

Banklar, kent yaşamının en sade ama en anlamlı duraklarından biri.
Şehrin temposu içinde kısa bir mola, bir karşılaşma ya da sadece etrafı izleme anı yaratan bir ürün.
İSTON, mühendislik, teknoloji ve tasarımın bir araya geldiği yaklaşımıyla; bu anları daha konforlu, daha estetik ve daha kaliteli hâle getiren banklar tasarlar. Her ürün, kamusal alanlarda yaşam kalitesini artırma ve kentle kurulan bağı güçlendirme fikrinden beslenir.
Metal, beton ve ahşabın dengeli birlikteliğiyle üretilen İSTON bankları; dayanıklılığı, kullanım kolaylığı ve yalın tasarım diliyle bulundukları çevreye uyum sağlar. Parklardan meydanlara, farklı ölçek ve ihtiyaçlara cevap veren çözümler sunar.
Kentlerin bugünü kadar geleceğini de gözeten bu tasarımlar, herkes için daha yaşanabilir, davetkâr ve sürdürülebilir kamusal alanların parçası olmayı hedefler.

Benches are among the simplest yet most meaningful stops of urban life. They create moments of short rest within the rhythm of the city—moments for an encounter or simply for observing the surroundings.
Benches are among the simplest yet most meaningful stops of urban life. They create moments of short rest within the rhythm of the city—moments for an encounter or simply for observing the surroundings.
Produced through a balanced combination of metal, concrete, and wood, İSTON benches adapt seamlessly to their surroundings with their durability, ease of use, and understated design language. From parks to squares, they offer solutions that respond to different scales and needs.
Taking into account not only the present but also the future of cities, these designs aim to become part of more livable, inviting, and sustainable public spaces for everyone.

Milan Bank / Milan Bench

Kentte Temiz Alanlar

Clean Spaces in the City

Çöp kutuları, kentsel yaşamda düzenin ve temizliğin sürekliliğini sağlar. Kamusal alanlarda görünürlük, erişilebilirlik ve dayanıklılık kadar; çevreyle kurduğu ilişki de önem taşır.
İSTON çöp kutuları, farklı kullanım alanlarına uyum sağlayan tasarımları ve ürün çeşitliliğiyle parklar, sokaklar, meydanlar, kapalı alanlar ve sosyal alanlar için bütüncül çözümler sunar. Form, malzeme ve yerleşim dengesi; temizlik alışkanlıklarını destekleyecek şekilde kurgulanır.
Kent dokusuyla uyumlu, sade ve uzun ömürlü yapılarıyla İSTON çöp kutuları; kamusal alanlarda temizliğin doğal bir parçası hâline gelir. Günlük kullanımın akışına eşlik ederken, daha düzenli ve yaşanabilir şehirler için sessizce görevini yerine getirir.

Litter bins ensure the continuity of order and cleanliness in urban life. In public spaces, their relationship with the surrounding environment is as important as visibility, accessibility, and durability.
With designs adaptable to different areas of use and a wide product range, İSTON litter bins offer integrated solutions for parks, streets, squares, indoor spaces, and social areas. The balance of form, material, and placement is carefully designed to support cleanliness habits.
With their simple, long-lasting structures that harmonize with the urban fabric, İSTON litter bins become a natural part of cleanliness in public spaces. While accompanying the flow of daily use, they quietly fulfill their role in creating more orderly and livable cities.

Kentte Bir Araya Gelmek

Coming Together in the City

Masalar, kent içinde bir araya gelmenin ve paylaşmanın en doğal zeminlerinden biri olarak karşımıza çıkar. Parklarda, yeşil alanlarda ve açık kamusal mekânlarda, şehirle kurulan ilişkiye daha sakin bir ritim kazandırır.
İSTON masaları, dayanıklı yapısı ve yalın tasarım diliyle doğayla uyumlu kullanım alanları oluşturur. Günlük buluşmalardan kısa molalara kadar farklı anlara eşlik eder; kamusal alanlarda birlikte vakit geçirmeyi destekleyen işlevsel çözümler sunar.

Tables emerge as one of the most natural platforms for coming together and sharing in urban life. In parks, green areas, and open public spaces, they bring a calmer rhythm to the relationship between people and the city.
With their durable structure and understated design language, İSTON tables create usage areas that harmonize with nature. From everyday gatherings to short breaks, they accompany different moments, offering functional solutions that encourage spending time together in public spaces.

Kentte Doğal Denge

Natural Balance in the City

Kent, yalnızca yapıların değil; doğayla kurulan ilişkinin de tasarlandığı bir alan.
Yeşil ise bu ilişkinin en yalın ve en güçlü ifadesi.
İSTON çiçeklikleri, doğanın renklerini kontrollü ve çağdaş bir tasarım anlayışıyla kamusal alanlara taşır. Form, malzeme ve ölçek; bitkilerin canlılığını öne çıkaracak şekilde kurgulanır, kent dokusuyla uyumlu bir bütünlük oluşturur.
Sarı, kırmızı, pembe ve daha birçok renge yaşam alanı sunarak bulunduğu her ortama renk katan bu tasarımlar; sokaklar, caddeler ve parklar için estetik bir denge sunar. Çiçeklikler, yalnızca bitkiler için değil; kentin ritmini yumuşatan, mekâna karakter kazandıran tasarım öğeleri olarak konumlanır.
İSTON çiçeklikleri, hızla dönüşen şehirlerde doğayla kurulan bağı güçlendiren; yaşam alanlarını daha davetkâr, dengeli ve nitelikli kılan kentsel tamamlayıcılar olarak karşımıza çıkar.

The city is not only a space shaped by buildings, but also one where the relationship with nature is designed. Greenery is the most simple and powerful expression of this relationship.
İSTON planters bring the colors of nature into public spaces through a controlled and contemporary design approach. Form, material, and scale are carefully considered to highlight the vitality of plants, creating a cohesive whole that harmonizes with the urban fabric
Offering a living space for yellow, red, pink, and many other colors, these designs add vibrancy to every environment they inhabit, providing an aesthetic balance for streets, avenues, and parks. Planters are positioned not only as containers for plants, but as design elements that soften the rhythm of the city and add character to spaces.
In rapidly transforming cities, İSTON planters stand out as urban complements that strengthen the bond between people and nature, making living spaces more inviting, balanced, and refined.

Kentte Düzen ve Güven

Order and Safety in the City

Sınır elemanları, kent içinde düzeni ve güvenliği sessizce sağlayan tamamlayıcı unsurlardır. Yaya ve taşıt hareketinin yoğun olduğu alanlarda akışı yönlendirir, kamusal alanlarda net ama ölçülü bir ayrım oluşturur.

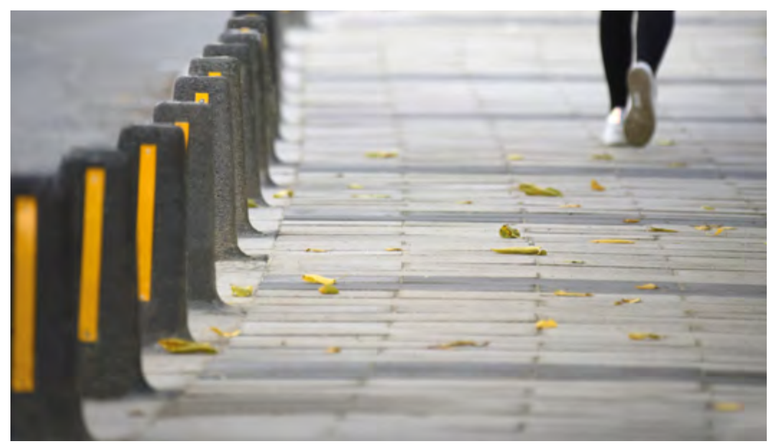

İSTON sınır elemanları, göz seviyesinin altında konumlanan formlarıyla çevreyle uyumlu bir görünüm sunar. Bulundukları mekânda dikkat çekmeden işlevini yerine getirir; kaldırımlardan parklara, meydanlardan ticari alanlara kadar farklı kullanım senaryolarına kolayca uyarlanır.

Farklı renk ve form seçenekleriyle mekânın karakterine eşlik eder. Dayanıklı yapısı ve sade tasarım diliyle sınırları sertleştirmeden tanımlar; şehir yaşamında düzen, güvenlik ve süreklilik sağlar.

Bollards are complementary components that quietly ensure order and safety within the urban environment. In areas with intense pedestrian and vehicular traffic, they guide movement and create clear yet measured distinctions in public spaces.

İSTON's bollards offer a harmonious appearance with their forms positioned below eye level. They perform their function without drawing attention, and can be easily adapted to different usage scenarios—from sidewalks and parks to squares and commercial areas.

With various color and form options, they accompany the character of the space. With their durable structure and understated design language, they define boundaries without hardening them, ensuring order, safety, and continuity in urban life.

Kentte Dinlenme

Resting in the City

Pergola ve kameriyeler, kamusal alanlarda dinlenme, buluşma ve korunma ihtiyacına cevap veren tamamlayıcı yapılardır. Parklarda, bahçelerde ve açık alanlarda, kent yaşamına daha sakin ve dengeli bir ritim kazandırır.
İSTON pergola ve kameriyeler; doğal malzeme kullanımı, yalın tasarım anlayışı ve dayanıklı yapısıyla bulunduğu çevreyle uyumlu çözümler sunar. Gölge sağlayan, mevsim koşullarına karşı korunak oluşturan bu yapılar; açık alan kullanımını yılın farklı dönemlerinde mümkün kılar.
Doğal ahşabın sıcaklığını kamusal alanlara taşıyan tasarımlar, birlikte vakit geçirmeyi destekleyen konforlu mekânlar yaratır.

Pergolas and gazebos are complementary structures that respond to the needs for rest, gathering, and shelter in public spaces. In parks, gardens, and open areas, they bring a calmer and more balanced rhythm to urban life.
İSTON pergolas and gazebos offer solutions that harmonize with their surroundings through the use of natural materials, an understated design approach, and durable construction. Providing shade and protection against seasonal conditions, these structures enable the use of open spaces throughout different periods of the year.
Designs that carry the warmth of natural wood into public spaces create comfortable environments that encourage spending time together.

Kentte Keşfederek Büyümek

Growing by Exploring in the City

Oyun, çocukların dünyayı tanıdığı, sınırlarını keşfettiği ve birlikte olmayı öğrendiği doğal bir süreçtir. Kamusal alanlardaki oyun grupları ise bu süreci destekleyen güvenli ve kapsayıcı mekânlar olarak öne çıkar.

İSTON çocuk oyun grupları; hareketi teşvik eden, denge ve koordinasyonu destekleyen, hayal gücünü besleyen tasarımlarla kurgulanır. Her bir oyun alanı, çocukların kendi ritminde keşfetmesine ve gelişmesine alan açar.

Dayanıklı yapıları ve yalın tasarım diliyle parklar ve açık alanlarla uyum içinde konumlanan bu gruplar; yalnızca eğlenceli değil, aynı zamanda çocukların sosyal etkileşimini güçlendiren yaşam alanları sunar. İSTON oyun alanları, kentin içinde çocuklar için güvenli, nitelikli ve ilham verici oyun ortamları oluşturur.

Play is a natural process through which children discover the world, explore their boundaries, and learn how to be together. Playground equipment in public spaces stands out as safe and inclusive environments that support this process.

İSTON children's playground equipment is designed to encourage movement, support balance and coordination, and nurture imagination. Each play area creates space for children to explore and develop at their own pace.

With their durable structures and understated design language, these playgrounds integrate harmoniously with parks and open spaces, offering environments that are not only enjoyable but also strengthen children's social interaction. İSTON playgrounds create safe, high-quality, and inspiring play environments for children within the city.

Kentin Dört Ayaklı Dostlarına Yaşam Alanları
Living Spaces for the City's Four Leged Friends

İSTON, kentlerin dört ayaklı sakinlerine de alanlar sunar. Köpeklerin enerjilerini güvenli bir ortamda atabilecekleri, oyunla sosyalleşip eğitilebilecekleri parklar tasarlar. 11 farklı oyun elemanından oluşan bu alanlar, dostlarımızın keyifli ve sağlıklı bir yaşam sürmesi için özenle planlanır.
Ayrıca kedilerimiz için 3D beton yazıcımız ile farklı formlarda kedi evleri de üretir.

İSTON also creates spaces for the four-legged residents of cities. It designs parks where dogs can safely release their energy, socialize through play, and be trained. Comprising 11 different play elements, these areas are carefully planned to support the well-being and healthy lifestyles of our companions.
In addition, İSTON produces cat houses in various forms using its 3D concrete printing technology, providing dedicated living spaces for our feline friends as well.

Kaykay Parkı ve Pumptrack

Skatepark & Pumptrack

Kentte Dinamik Anlar

Dynamic Spaces in the City

İSTON, şehirde sporu ve özgürlüğü buluşturan dinamik alanlar da yaratır. Kaykay parkları ve pumptrack alanları, kent içinde hareketi, dengeyi ve sürekliliği odağına alan aktif yaşam mekânlarıdır. Farklı yaş ve deneyim seviyelerine hitap eden bu alanlar, sporla kurulan ilişkiye akıcı ve dinamik bir zemin sunar.
İSTON'un tasarladığı kaykay parkı ve pumptrack çözümleri; kaykay, paten ve bisiklet gibi farklı kullanım senaryolarını destekleyecek şekilde kurgulanır. Parkurlar, kullanıcıların güvenli bir ortamda hareket etmesini sağlarken, kamusal alanlara enerjik bir kullanım kazandırır.
Açık alanlarla bütünleşen bu tasarımlar, kent yaşamında fiziksel aktiviteyi teşvik eden, bir araya gelmeyi ve paylaşımı destekleyen çağdaş spor alanları olarak konumlanır.

İSTON also creates dynamic spaces that bring sport and freedom together in the urban environment. Skate parks and pump track areas are active living spaces that focus on movement, balance, and continuity within the city. Catering to different age groups and experience levels, these areas provide a fluid and dynamic foundation for engaging with sport.
Skate park and pump track solutions designed by İSTON are configured to support various usage scenarios, including skateboarding, roller skating, and cycling. While the tracks enable users to move safely, they also introduce an energetic use of public spaces.
Integrated with open areas, these designs are positioned as contemporary sports spaces that encourage physical activity, foster togetherness, and support sharing in urban life.

Kentte 3D Teknolojisi ile Tasarlanan Ürünler

Products Designed with 3D Technology in the City

3D beton yazıcı teknolojisi, mühendislik, teknoloji ve tasarımın bir araya geldiği yeni bir üretim yaklaşımını temsil eder. İSTON, bu teknolojiyi ülkemizle ilk kez buluşturarak, kentsel donatı üretiminde dijital bir perspektifin gelişmesine öncülük eder. Ayrıca İSTON, Türkiye'nin 3D beton yazıcı teknolojisiyle üretilen ilk yapısını inşa eden şirket olma ünvanını taşır.

Betonun dijital ortamda şekillendirilebilmesi; geleneksel üretim süreçlerinde yer alan kalıp, işçilik, taşıma ve montaj gibi aşamaları sadeleştirirken, üretimde esneklik ve verimlilik imkânı sunar. Bu yaklaşım, malzeme kullanımını daha kontrollü hâle getirirken, katma değeri yüksek tasarımların ortaya çıkmasına zemin hazırlar.

Dijital üretim teknolojisi, kalıplı imalatla sınırlandırılması güç olan formların uygulanabilmesini mümkün kılar. Böylece kent mobilyalarında mimari ifade çeşitlenir; fonksiyon, dayanıklılık ve tasarım bir arada düşünülür.

İSTON'un 3D beton yazıcı teknolojisiyle üretilen çalışmaları, kentsel mekânlarda yenilikçi ve geleceğe uyumlu tasarımlar geliştirme yaklaşımının doğal bir parçası olarak konumlanır. Kentlerin bugunku ihtiyaçlarını gözetirken, yarının yaşam alanlarına dair yeni olanaklar sunar.

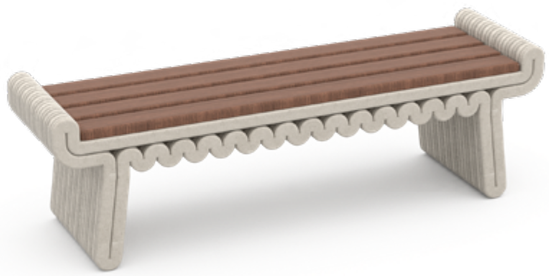

3D concrete printing technology represents a new manufacturing approach that brings together engineering, technology, and design. İSTON is pioneering the development of a digital perspective in urban infrastructure production by introducing this technology to Turkey for the first time. Furthermore, İSTON holds the distinction of being the first company in Turkey to construct a building using 3D concrete printing technology.

The ability to shape concrete in a digital environment simplifies stages such as formwork, labor, transportation, and installation found in traditional production processes, while offering flexibility and efficiency in manufacturing. This approach enables more controlled material usage and creates a foundation for high value-added designs.

Digital manufacturing technology makes it possible to realize forms that are difficult to achieve through conventional form-based production. As a result, architectural expression in urban furniture is diversified, and function, durability, and design are considered together.

3D Ardeco Bank / 3D Ardeco Bench

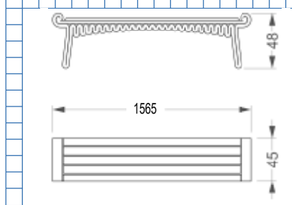

408 11 000000 006

Teknik Özellikler / Technical Details

Renkler / Colors

Ağırlık / Weight 193 kg

PARKE TAŞI & BORDÜRLER

PAVING STONES AND BORDURES

Kentteki Adımlar

Steps in the City

İSTON parke taşı ve bordürleri, şehir zeminlerine güzellik, kalite ve dayanıklılık kazandırır. Farklı ebat, doku ve renk seçenekleriyle çeşitli kullanım alanlarına uyum sağlar. Doğaya duyarlı üretim yaklaşımı ve yüksek mukavemetiyle, açık veya kapalı her alanda uzun ömürlü ve güvenli bir kullanım sağlar. İSTON taşları, sadece yüzeyleri değil, şehirlerin kimliğini de güzelleştirir.

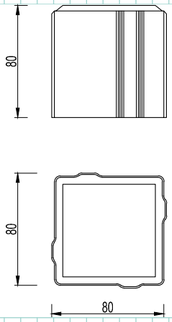

İSTON paving stones and curbstones add aesthetics, quality, and durability to urban surfaces. With a wide range of sizes, textures, and color options, they adapt to various areas of use. Thanks to an environmentally conscious production approach and high strength, they ensure long-lasting and safe use in both open and enclosed spaces. İSTON stones enhance not only surfaces, but also the identity of cities.

Kentte Güven Veren Altyapı Çözümleri

Reliable Infastructure Solutions for the City

İSTON, geniş ürün yelpazesi ve mühendislik yaklaşımıyla dayanıklı şehirlerin temelini oluşturan altyapı sistemleri için yüksek performanslı beton ve betonarme borular üreterek ihtiyaçlara göre çözümler sunar. Farklı dolgu yüklerine, iç basınca ve korozyona karşı üstün dayanıklılık gösteren bu ürünler, uzun ömürlü altyapı çözümleri üretir. Tamamen yerli hammaddelerle, ileri üretim teknolojisi kullanılarak geliştirilen İSTON boruları, geleceğin altyapılarını bugünden inşa eder.

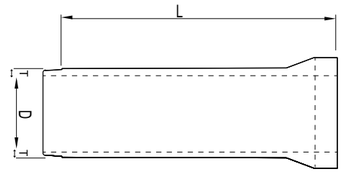

With its extensive product range and engineering-driven approach, İSTON produces high-performance concrete and reinforced concrete pipes for infrastructure systems that form the foundation of resilient cities, offering solutions tailored to diverse needs. Demonstrating superior resistance to different backfill loads, internal pressure, and corrosion, these products deliver long-lasting infrastructure solutions. Developed using advanced production technologies and entirely domestic raw materials, İSTON pipes build the infrastructures of the future today.

Beton - Betonarme Boru - Çember ve Elemanları
Concrete-Reinforced Concrete Pipes - Ring and its Components

Entegre Contalı Muflu Beton Borular
Concrete Pipes (Integrated Gasket)

HAZIR BETON
READY-MIXED CONCRETE

Kentte Sağlam Yapıların Temeli

The Foundation of Solid Structures in the City

Kentlerin oluşumunda en önemli konulardan biri de sağlam yapılaşmadır. Gelişmiş hazır beton üretim teknolojisi sağlam kentleşmenin en önemli unsurlarından biridir. İSTON, hazır betonda da yüksek kalite standartlarında hizmet vermektedir.
İSTON, geniş araç filosu, uzman kadrosu, yüksek üretim teknolojisi, entegre üretim ağı ile dünya standartlarında hazır beton üretimi yaparak sağlam yapı ve kentsel donatıları kente kazandırmaktadır.

One of the most important case in the formation of cities is solid construction. One of the most important factors of solid urbanization is advanced ready-mixed concrete production technology. İSTON serves in ready mixed concrete at high quality standards as well.
With its wide vehicle fleet, expert staff, high production technology, integrated production network, İSTON produces ready-mixed concrete at world standards and brings solid structures and urban facilities to the city.

KALİTE
Fabrika girişinde ham maddelerden numune alınarak elek analizi ve özgül ağırlık deney sonuçlarına göre bilgisayar ortamında beton dizaynı yapılmaktadır. Üretilen beton, İSTON Kalite Kontrol Laboratuvarı'nda Slump ve Vebe deneylerine tabi tutulup küp ve silindir numuneleri alınarak 7 ve 28 günlük mukavemet değerleri TS EN 206-ı'e göre tespit edilip ilgili firmalara gönderilmektedir.

HAZIR BETONDA KALİTE
Güvenli yapılar için TS EN 206'ı uygun hazır beton üretimi yapılmaktadır. C 14-C50 beton sınıflarında hazır beton üretilmektedir. Ayrıca C 20-C 40 sınıflarında kendiliğinden yerleşen beton üretimi de yapılmaktadır.

ÜRETİM TESİSLERİ ve KAPASİTELERİ

TUZLA: 80 m3/saat
HADIMKÖY: 90 m3/saat

TOPLAM: 170 m3/saat

QUALITY
Concretes are designed with computers according to the sieve analysis and specific weight experiment's results obtained from the samples of raw materials taken in the factory entrance. Concretes produced delivered to firms after 7 and 28 daily resistance values are determined in conformity with TS EN 206-i and by the cube and cylindrical samples obtained from Slump and Vebe tests in İSTON Quality Control Laboratories.

QUALITY IN READY-MIXED CONCRETE
Ready-mixed concretes are produced in conformity with TS EN 206 for secure structures. İSTON produces ready- mixed concretes in C14-C50 concrete classes. Also İSTON produces self-compacting concrete in C20-C40 classes.

PRODUCTION PLANTS and CAPACITY

TUZLA: 80 m³/h
HADIMKÖY: 90 m³/h

TOTAL: 170 m³/h

Kentte Yapı ve İnşaat Denetimi

Building and Construction Testing in the City

İSTON; altyapı, üstyapı, ulaştırma yapıları gibi inşaatlarda kullanılan beton, çelik, asfalt, zemin dolgusu vb. yapı malzemelerinin ve uygulamalarının deneylerini Yapı ve Malzeme Laboratuvarlarında gerçekleştirir.

İSTON conducts testing of construction materials and applications—such as concrete, steel, asphalt, and fill materials—used in infrastructure, superstructure, and transportation structures, as well as Building Earthquake Performance Analysis services.

YAPI VE MALZEME LABORATUVARI
STRUCTURAL AND MATERIALS LABORATORY

Bu deneylerin yanında yapıların "Bina Deprem Performans Analizi" hizmetlerini de verir. TURKAK tarafından uluslararası düzeyde akredite olan İSTON Laboratuvarları, TS EN ISO/IEC 17025 Standardına uygun olarak faaliyetlerini yürütür. Anadolu Yakası'nda iki, Avrupa Yakası'nda iki olmak üzere 4 farklı lokasyondaki Yapı ve Malzeme ile Kalite laboratuvarlarında hizmet verir.

In addition to these tests, it also provides "Building Seismic Performance Analysis" services for structures. Accredited internationally by TURKAK, İSTON Laboratories operate in accordance with the TS EN ISO/IEC 17025 Standard. It provides services in four different locations: two on the Anatolian side and two on the European side of Istanbul, in its Building and Materials and Quality laboratories.

Laboratuvarlarımızda 222 adet deney yapılmaktadır.
99 adet deney TÜRKAK akreditasyon kapsamındadır.

- Agrega deneyleri (16 adet)
- Taze beton deneyleri (16 adet)
- Sertleşmiş beton deneyleri (22 adet)
- Karot ve donatı tespit deneyleri (10 adet)
- Çelik çubuk deneyleri (14 adet)
- Doğal yapı taşları deneyleri (15 adet)
- Asfalt deneyleri (5 adet)
- Zemin deneyleri (22 adet)
- Çevresel gürültü ölçüm deneyleri (2 adet)
- Alaşımlı / alaşımsız çelik, dökme demir ve demir dışı metal deneyleri (11 adet)
- Bina inceleme ve raporlama (14 adet)
- Çimento deneyleri (10 adet)
- Beton ve betonarme boru deneyleri (13 adet)
- Beton parke taşı deneyleri (8 adet)
- Beton plak taş deneyleri (8 adet)
- Beton bordür deneyleri (8 adet)
- Polimer deneyleri (15 adet)
- Kimyasal beton katkı deneyleri (6 adet)
- Sıvıların kimyasal ve fiziksel deneyleri (4 adet)
- Izgara takımları ve bakım rögar kaplama elemanları deneyleri (3 adet)

İSTON Yönetim Sistemleri Belgeleri / ISTON Management Systems Documents

İSTON tüm ürünlerini tesis bazında **TSE** tarafından ürün belgeli olarak ilgili standartlar gereğince yapmaktadır. Hazır Beton tesislerinde ise **Çevre ve Şehircilik Bakanlığı** tarafından zorunlu tutulan G uygunluk belgesine ve tüm ürün gruplarımız ilgili standartları kapsamında **CE** belgesine sahiptir.
Tesislerinde yönetim sistemlerinin öneminin ve yasal mevzuatlara uyumun bilincinde olan İSTON aşağıdaki belgelere sahiptir.

- *Kalite Yönetim Sistemi*
- *Çevre Yönetim Sistemi*
- *İş Sağlığı ve Güvenliği Yönetim Sistemi*
- *Bilgi Güvenliği Yönetim Sistemi*
- *Laboratuvar Akreditasyon Sertifikası*
- *Deney Hizmeti Alınabilecek Laboratuvar Onayı Belgesi*
- *Hazır Beton G Uygunluk Belgeleri*
- *Uluslararası Beton Sürdürülebilirlik Konseyi (CSC) - Kaynakların Sorumlu Kullanımı Belgeleri*
- *Çevre İzin Belgesi*
- *Riskli Yapı Tespiti Lisans Belgesi*

Tuzla ve Hadımköy fabrikalarımız Uluslararası Beton Sürdürülebilirlik Konseyi (CSC) Kaynakların Sorumlu Kullanımı Gümüş, Altın ve Platin sertifikalarına sahiptir.
